Cancelled Flights

WHAT THIS ANALYSIS ANSWERS

Q1

Flight Volume Trends

How do total flight volumes, delays and cancellations trend month by month across 2015?

Q2

Busiest Airport Cities

Which U.S. cities handle the highest volume of domestic flights?

Q3

Airline Delay Performance

Which airlines are most likely to experience flight delays? Who performs best vs worst?

Q4

Cancellation Root Causes

What are the primary reasons behind flight cancellations — weather, carrier or systemic?

Q5

Day-of-Week Patterns

Are cancellations distributed evenly through the week, or are certain days more prone?

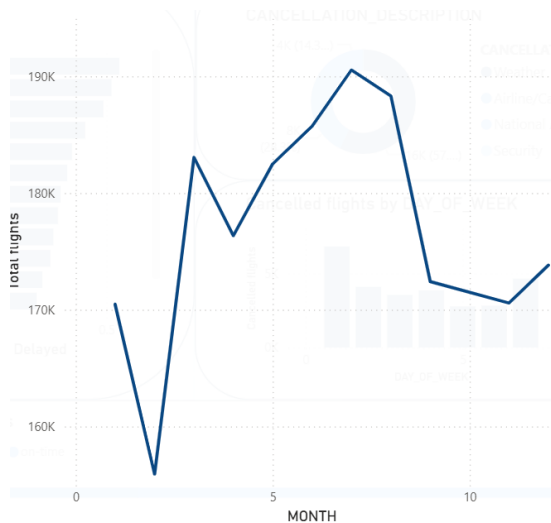

Q6

Overall Flight Outcomes

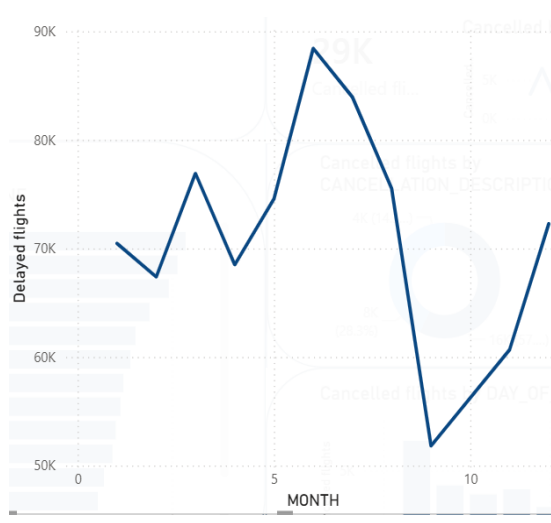

What proportion of all flights in 2015 were on-time, delayed or cancelled?

Q1 MONTHLY FLIGHT TRENDS — 2015

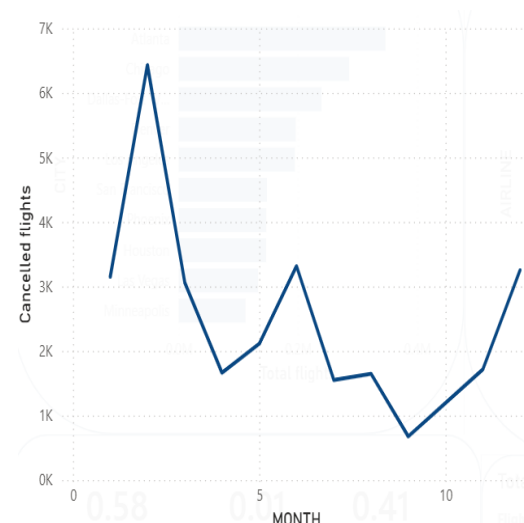

Total Flights by Month

Delayed Flights by Month

Cancelled Flights by Month

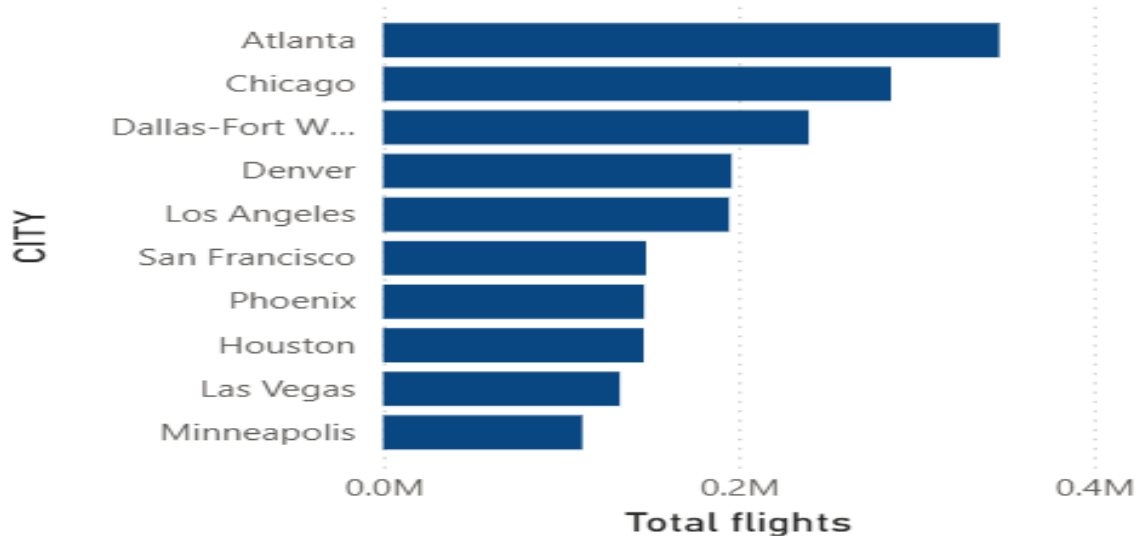

Key Insight:

June–August is the peak travel season with the highest delay volumes. February recorded the most cancellations (6,432), likely driven by winter weather. September showed the fewest delays and cancellations — optimal flying conditions.

Q2 TOTAL FLIGHTS BY CITY

Total flights by CITY

Top 5 Hubs

Atlanta

346,836 flights | #1 Busiest — Hartsfield-Jackson leads by a wide margin

Chicago

285,884 flights | #2 — O'Hare & Midway combined volume

Dallas-FW

239,551 flights | #3 — Major Southwest and AA hub

Denver

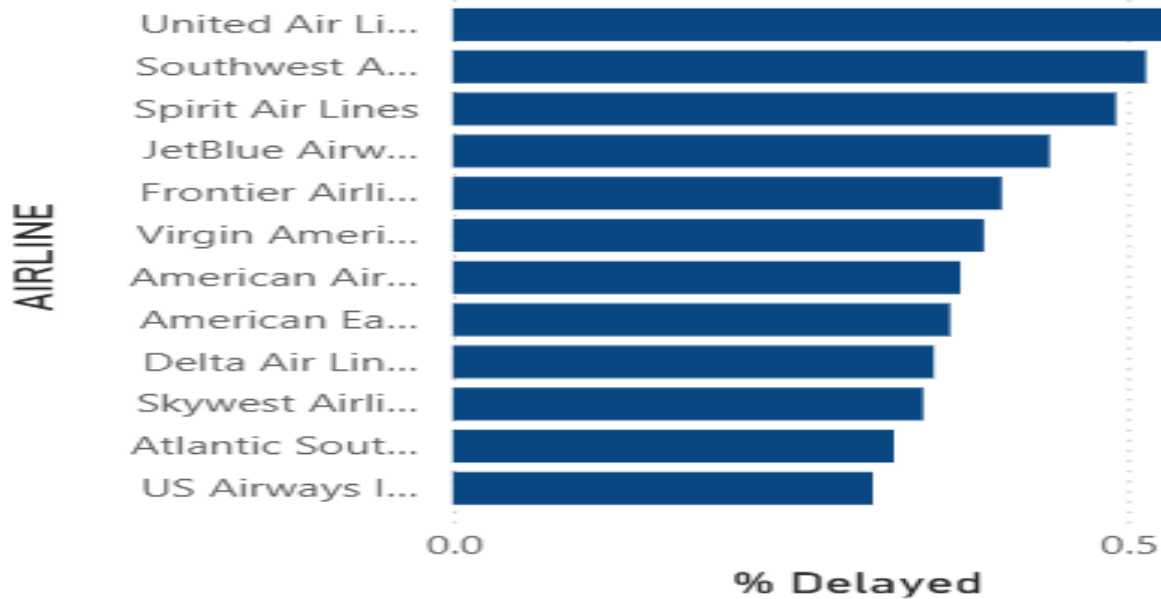

196,055 flights | #4 — Key mountain-region hub

Los Angeles

194,673 flights | #5 — West Coast gateway

Q3 % DELAYED BY AIRLINE

KEY INSIGHTS & RECOMMENDATIONS

For Shareholder Review

Weather is the #1 Cancellation Driver

57.3% of all cancellations were weather-related. Investing in predictive weather tools and flexible rebooking systems will directly reduce passenger disruption.

Mondays Account for 24% of Weekly Cancellations

6,819 Monday cancellations vs 2,776 on Fridays. This suggests cascading weekend delays rolling over into Mondays — targeted crew scheduling can mitigate this.

United Air lines Inc Lead Delay Rates at 50%+

US Airways Inc demonstrates that sub-30% delay rate is achievable. United Air lines Inc should benchmark these operations for improvement.

Atlanta Dominates with 346,836 Flights

The top 3 hubs (Atlanta, Chicago, Dallas) collectively handle ~44% of total volume. Infrastructure capacity and staffing in these cities directly impacts national performance.

Summer Peak Demands Network Readiness

July is the busiest month at 190,548 flights with high delay rates. Pre-summer capacity planning and staffing scale-ups are critical for on-time performance.

Only 58% of Flights Arrive On-Time

With 41% of flights delayed, there is a clear opportunity to improve the passenger experience. Operational efficiency programs across the network should be prioritized.

Thank You
